# Introduction to ART Chain

ART Chain is a fully decentralized community autonomous token based on the BEP (BSC) network hairstyle. The token chips are scattered in the hands of each user through pre-sale. The token model is written into the smart contract and cannot be tampered with. Large-scale control is a value token that is 100% circulated in the market and created by community consensus. The pre-sale of ART Chain will be launched at the end of July 2021. ART Chain is completely decentralized, and all decisions are made by community voting. This allows our developers to better understand how to use ART Chain. ART Chain is a pre-sale issued token, and the development team does not have a team token. In other words, our team must participate in the ART Chain pre-sale together with other investors.

### **Project Description:**

The sole purpose of the creation of the ART art chain is that investors can receive dividends while holding the token ART. This is a fairly new concept and not easily available in the market or other tokens. The ART model will far exceed centralized tokens. In fact, we took time to verify that it became one of the first decentralized tokens with practical value and became a utility token.

# How can I earn ten thousand times the income by holding the ART chain?

5%

This is a very unique model. Every time someone buys or sells ART, their buy/sell (5% of them) is automatically added to the fund pool. The larger the pool over time, the higher the price.

4%

You can pay dividends based on the ART you hold. For example, if you hold 1% of the ART supply, you can get 1% of the reward pool. As time goes by, the number of ARTs will become more and more tired.

1%

NFT creator dividend  
ART can attract many art creators with dreams. After their works are reviewed, they can upload their works through the platform and enjoy the platform transaction fee dividends.

2%

Lucky dividend award, every time you buy more than 1 ART, you can get 2% of the next transaction fee as a dividend reward for real-time settlement. If the target is not met, 2% of all transaction orders and transfer fees during the period will be returned to the previous purchase Address all, until the new standard pays. The setting of this mechanism is conducive to increasing the volume of buying orders and causing the currency price to spiral upward.

3%

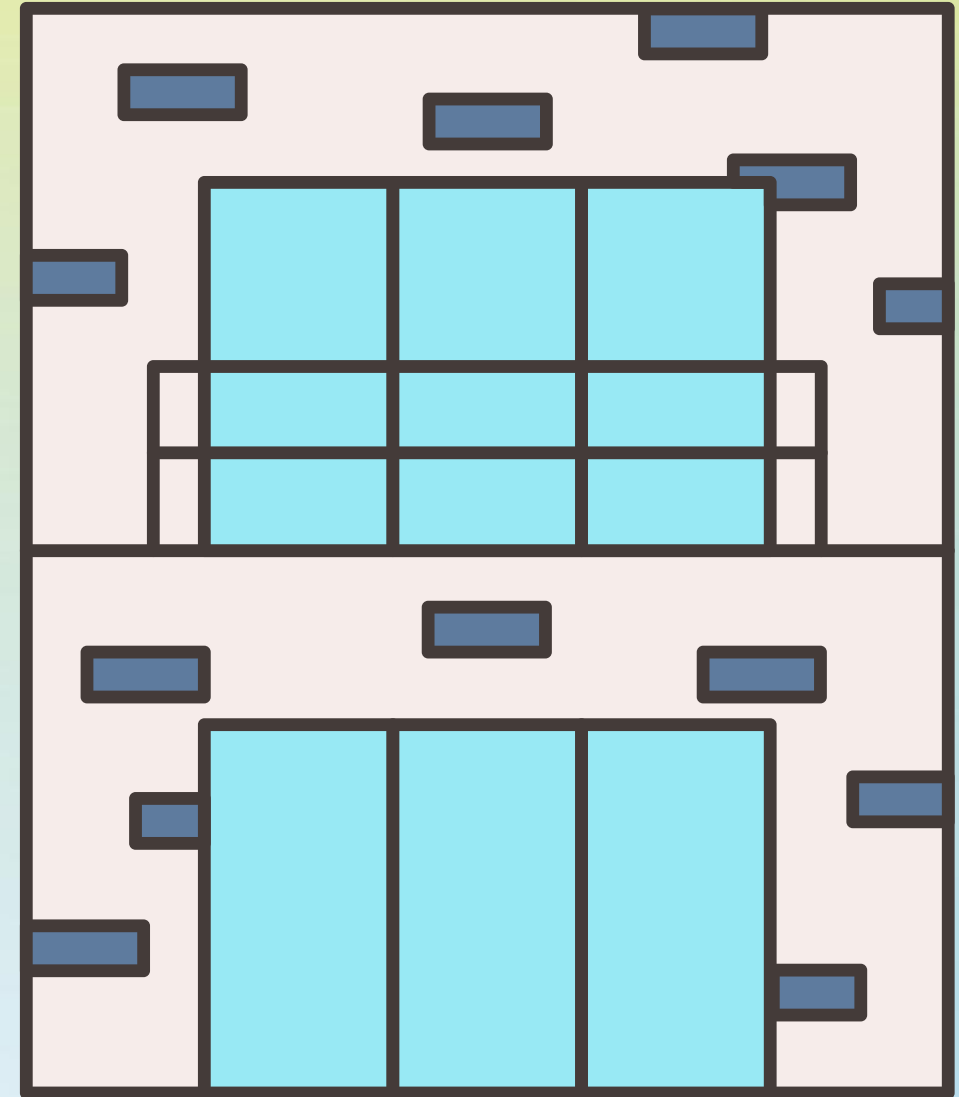

Node dividends, the mechanism is conducive to screening loyal promoters, and there are quota restrictions, nodes have an assessment mechanism, and nodes will also receive generous rewards. Example: If the daily transaction volume is 10 million usdt, then 30 nodes can share the rewards in the pool equally, and each node will receive a node dividend of 10,000 usdt on average.

# Repurchase mechanism

3000 pieces of customized NFT modern art are the same as ART tokens, and ART can be exchanged for modern NFT art products of the same value as collections.

For example, there are 10 models in a series of products, and if a series of products are collected, there will be corresponding collector dividends. If the platform generates profits, 50% of the profit will be purchased every month to buy ART into the repurchase land and never circulate.

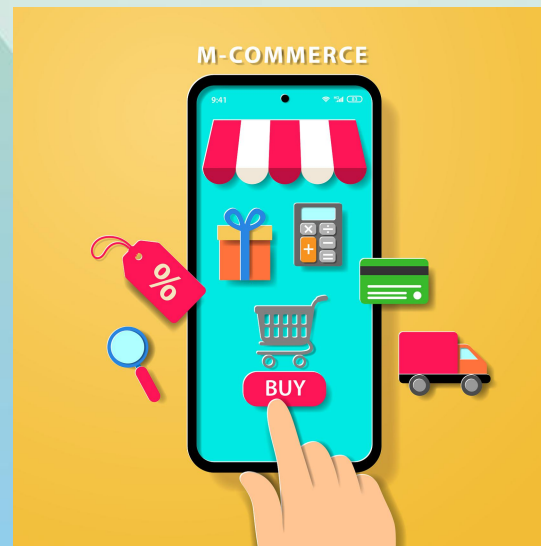

# ART store

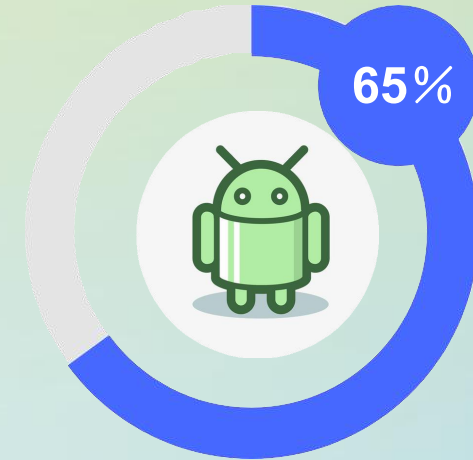

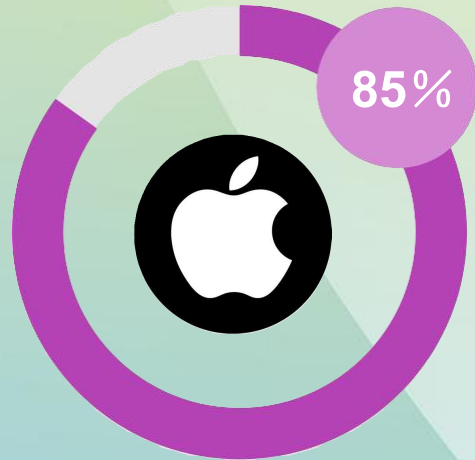

- The commodity website allows users to purchase all ART commodities and integrates a system to support the commodities sold by ART using our platform.
- The crypto team that uses the platform to sell goods will charge a certain percentage of transaction fees on each order and distribute it to contributors.
- We will try to integrate cryptocurrency payment methods into the website to allow users to connect their trusted wallet or metamask to pay for goods on the website, as well as payment methods such as credit and debit cards.

# ART wallet

ART wallet mining: Let the blockchain happen everywhere

Multi-chain wallet, safe and easy to use, blockchain entry

# ART Chain艺术链简介

ART Chain是一家基于BEP(BSC)网络发型的完全去中心化社区自治代币，代币筹码通过预售方式分散在每个用户手上，代币模型写入了智能合约无法篡改决定了无庄和大户操控，是一个100%流通于市场靠社区共识打造的价值代币，ART Chain预售将于2021年7月底推出。ART Chain是完全去中心化的，所有的决定都是由社区投票决定的。这让我们的开发人员更好地了解如何使用ART Chain。ART Chain是预售发布的令牌，开发团队没有团队令牌。换句话说，我们的团队必须与其他投资者一起参与ART Chain预售。

项目简介：

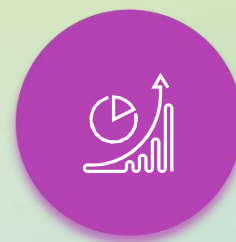

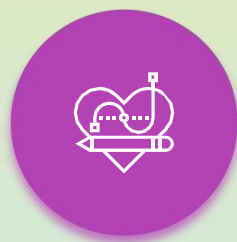

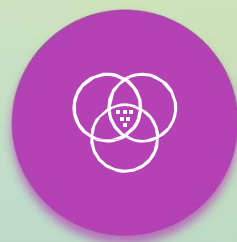

**ART**艺术链的创建唯一的目的是投资者在持有代币**ART**的同时能够收取分红奖励。这是一个相当新的概念，在市场或其他代币中并不容易获得。**ART**模型将远远超过中心化代币。事实上，我们用时间去验证它成为第一个具有实际价值的去中心化令牌之一，并成为实用令牌。
